unilog

We deliver your promises

Global Fulfillment

Unilog provides comprehensive, efficient, reliable, fast, transparent, and agile supply chain management solutions to facilitate your business needs. Our Supply Chain as a Service (SCaaS) – driven by our Logivice platform, integrates the entire supply chain. Connecting your multichannel sales to our global fulfillment network of distribution centers gives your global supply chain an edge over your competitors.

Unilog enables your organization with a smart and robust Supply Chain design at the highest execution level. We are your partner in an end-to-end solution that meets your global business needs.

Unilog's network of selected distribution centers in major markets provides your business with the logistical infrastructure it needs to supply your products quickly and efficiently with a local presence, assuring high availability to support your sales flow. We are committed to providing a quality solution to our partners with a proven agile methodology tailored to your unique requirements.

Our distribution centers (DCs) network is built to create extensive convergence and scalability with a robust distribution network. Our DCs can accommodate large quantities of inventory for direct delivery to clients and retailers. They are equipped to handle various value-added services from re-labeling to SW installation, executing your every business need.

Global Inventory Planning and Management

Global Inventory Planning and Management – efficient models developed by our business intelligence team can help your organization to optimize your inventory levels and availability globally.

Distribution Transport Management

We are interconnected with more than 100 different carriers globally, allowing best-in-class solutions in every territory, both in terms of service and cost, ensuring real-time visibility on the final mile delivery.

Global Trade Compliance

Global trade compliance – our in-house team of global trade compliance together with a global network of in-country customs and tax consultantsensure your activity is compliant throughout your supply chain, we provide global coverage of IOR/ EOR services for both sales and RMA needs, including licensing and certification where required, ensuring undisrupted regulatory compliant supply flow.

Value-Added Services

Value-Added Services – a one-stop shop for your inventory needs. Our DCs provide a variety of value-added services which save you time, cost, and mileage:
- Inbound QC, power-up/boot-up testing
- Re-packing, packing, re-labeling & kitting
- Software updates
- Problem verification testing
- Tier 1 repairs, onsite technicians

Vendor scheduling and PO matching

we provide your organization a complete audit trail, with full visibility of your goods flow from the OEM to your inventory, available for the sales order. Matching internal or external purchase orders, allowing you a complete real-time overview of your supply, enabling you fact-based decision making and control.

VMI

Unilog can help you control your inventory and increase the availability of your products. Lower cost of capital due to a more efficient inventory management process, Reduced overall complexity and risk of the sourcing and storage process, and Lower administration cost by reducing minimum backorders and returns.
