

- Real-time sensors proactive control
- Contactless operation Stick & Go, no more waiting for courier scans or manual reporting
- Environmentally friendly & disposable
- Configurable business logic Tailored solution needs and Points-of-Interests
- Global connectivity simplicity pre-printed iSim card
- Seamless flight mode made of safe materials and approved by airlines

Preprinted iSim with WW 5G cellular connectivity

Non-hazardous Li-MnO2 battery

Sensors: location, flight, temperature, shock

Shipment & Condition Monitoring

\$100B annual losses

Asset Tracking (Ideal for circular supply chain)

## **Shipment & Condition Monitoring**

- Real-time visibility
- Temp condition alert
- Shock alert
- Proximity alerts
- POD alerts

Max temperature 20.0°

Min 0.0°

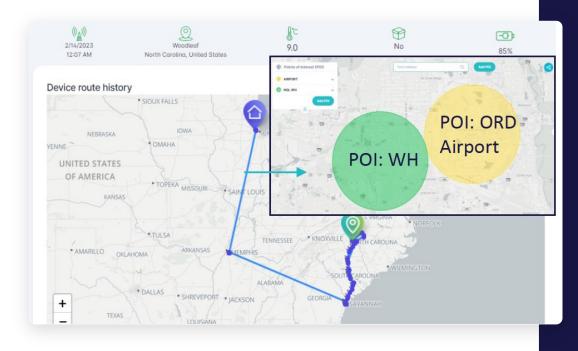

\$50B annual losses

# Asset Tracking (Ideal for circular supply chain)

- Prevent the loss of expensive equipment
- Tracing of SN events
- Idle time optimization
- High ROI

The user of the system can mark any Point-of-Interest (POI) on the map. POI can be an airport or a warehouse. An alert will be received once the label is located in this POI.

\$50B annual losses

### Open box tab-based triggered events

- VMI / Consignment Stock
- customs control
- unauthorized access
- lab rework
- Consigned / VMI stock control
- Real consumption data
- Expiry date / temp control
- Billing upon consumption alert
- Box open trigged events
